BLAST OF FLA

CENTERED SINGLE GLAZING

As the most traditional form in the Light Series, centering is not lowering the technical level; instead UVO insists on making the perfect products by choosing the artwork-class materials for the glass partitions.

DOUBLE GLAZING & TWO-WAY CABINET

The outstanding sound insulation of double glazing system together with the design of two-way cabinet reaches the ultimate vision—lighting and space utilization.

BIASED SINGLE GLAZING & GAUZE CURTAINS

As a breakthrough for traditional positioning forms of single glazing, biasing creates a uniform visual sense. The application of gauze curtains softens the overall office atmosphere and freely adjusts the space attribute - open or private.

IRREGULAR PARTITION

Not only does UVO implement regular space layouts, but also applies such irregular forms as inclined and curved surfaces to create a more flexible and active atmosphere in the space and to present the unique brand temperament of UVO.

BIASED AND CENTERED SINGLE GLAZING & DOUBLE-LAYER SOLID PANELS

The glass modules are connected without visible vertical joints, only to make a more transparent vision; the visible surface between glass and solid panel is 3mm only; the visible surface of Light Series main frame is 25mm, reaching the limit of the industry. UVO cares for every millimeter of visual experience and technical upgrade.

DOUBLE GLAZING AND DOUBLE- LAYER SOLID PANELS

To fit various functional spaces, the solid panel series of Light Series provide perfect solutions. Through applying solid panels of different textures and colors, the design collocation of shapes and colors can build a harmonious effect in the space and utmostly ensure the visual design requirements.

EXQUISITE JOINTS FOR DOUBLE GLAZING

EXQUISITE JOINTS FOR DOUBLE GLAZING

The L and T shaped joints of Light Series glass are directly jointed with 45° glass cutting technique, so as to guarantee visual unity and the best transparency, as well as to meet the customers' exquisite requirements for product details.

L-65

In areas where space is limited, visual simplicity is especially important to avoid sense of narrowness brought by partitions, thus the hope for a lighter idea has created countless problems.

Light 65 displays technological breakthroughs to achieve spacious within limited space, UVO finally came up with satisfying solutions, a new series L-65 was born.

LIGHT 65 COMBINES PERFECTLY WITH 65 DOOR SYSTEM UNIQUELY DESIGNED BY UVO

The functional and minimalist senses match flawlessly, retaining maximum lighting when achieving the best sound insulation effect to meet the demanding requirement of modern space design.

The exquisite joints realize interlaced reflection of light and shadow in the internal space, and the light reaches the maximum utilization due to the increased transparency and slimness, thus bringing agility with infinitely simplified vision.

The combination of solid and glass panels with transparent area reserved keeps uniform optical sense.

The Matte White frame with ultra-white glass shows a simple and modern style.

Matte black frame system, mysterious, showing a trace of elegance.

Light 27 is one of the most creative elements in the Light Series, which could be operated with manual and automatic sliding door, saving more space while maintaining on aesthetic angle.

Panorama means without any visible frame between glass and glass on the sizable glass wall, which is able to maximize visibility within limited space.

CURVED GLASS SYSTEM

Curved Glass System contributes mellow and flexible workplace, and improves the sense of space at the same time.

ART GLASS SYSTEM

ELECTRIC VENETIAN BLIND SYSTEM

Shutter System starts the open and private space with one click, which doesn' t block the natural light, but can switch the mode anytime and anywhere with the mood or working state.

MANUAL VENETIAN BLIND SYSTEM

SWITCHABLE GLASS SYSTEM

Adopting switchable glass, users are able to conduct the switch from transparent to shaded status in a second; a smart control system can be realized through overall planning and design by UVO, instantly responding to various demands for office space.

CURVED SWITCHABLE GLASS SYSTEM

Curved glass can also be made into atomization effect, connecting beauty and privacy, which has become a beautiful scenery in the office space.

SWITCHABLE GLASS DOOR SYSTEM

Switchable glass can apply to the door system, makes the rooms easily transform from private to open, enclosed to transparent.

INTELLIGENT CONTROL SYSTEM

MATERIAL HARD -WARE PANEL

UVO Group

UVO was founded in Hong Kong in 2017, that is a cutting-edge brand enterprise headquartered in Hong Kong that focuses on interior and exterior wall and smart modular space product system, integrating technical R&D, design, innovation, sales and services.

Through in-depth understanding of the international mainstream space product concept, and through full market research on the local Asian market, especially in view of the use habits of the Greater China and Southeast Asia market, we have developed a number of indoor and outdoor wall and smart modular space product systems, which perfectly interpret the brand concept and market positioning of UVO.

L-Series

The Light series stems from the desire for limitless simplification of lines, a protest against the visual constraints of the crisscrossing of traditional partitions.

After years of research and development, we breakthrough technical difficulties, gradually from the reduction of lines to the pursuit of slimmer and more transparent senses.

Whether private or open, whether soundproofed or decorative, the light series has a variety of products to choose from, forming a complete space system, and proposing a new way of thinking about space utilization.
